Web development specialist with over 6 years of experience in full-stack development using TypeScript, React, and Node.js. Skilled in building scalable web apps, microservices, and DevOps workflows. Experienced in Agile methodologies and cross-functional team collaboration, including documentation writing, presentations & knowledge sharing. Pragmatic, passionate, and product focused.

Skills

- **Languages & Frameworks:** Typescript, Javascript, React, Redux, Node.js, mongoDB, Vue.js, Angular, MySql + ORMs
- **Testing & QA:** Jest, Enzyme, Mocha, Chai, Playwright, Cypress
- **DevOps & Infrastructure:** Docker, AWS
- **Architecture:** REST APIs, CI/CD, Agile, TDD

Professional Experience

- **Full stack Developer** **AstroBaltics**
Typescript, Postgres, Node.js, NestJS, GraphQL, Docker, Vue, Quasar *Sept 2023 - July 2024 (Permanent)*
 - Web based POS & back office application platform built with Vue & Typescript
 - Developed Node.js backend service written in NestJS
 - Worked on large scale backend refactor involving system-wide database transactions
 - Developed deployed multiple front end features on the product roadmap (new pages, new components & more)
 - This role was laid off due to economic circumstances (employer had insufficient available work)
- **Software Developer** **Semble**
Typescript, React, Node.js, GraphQL, Docker, MongoDB, Figma, AWS *Sept 2023 - July 2024 (Contract)*
 - Web application platform built with React & Typescript
 - Worked on back end libraries & services as well as core application
 - Lead the planning, strategy & execution for a large internationalization project including workshops & documentation as well as development.
 - Deployed and monitored services via AWS, working alongside DevOps to spec out new services for i18n project.
- **Full Stack Developer** **Various Clients (Ruumi, Virtualis, UNLwise)**
Typescript, React, Node.js, GraphQL, Docker, MySQL, Cypress, Jest, Figma *May 2021 – Apr 2023 (Freelance)*
 - Delivered full stack and front end features across multiple client projects, primarily in Typescript/Node.js stacks.
 - Built and enhanced front end applications in React, Next.js, and Angular, including 3D visualization tools (Virtualis) and survey/admin dashboards (Ruumi).
 - Developed server-side rendering functionality and back end APIs in Node.js.
 - Implemented automated testing with Cypress, Playwright, Jest, Mocha, and Chai.
 - Collaborated on UI/UX improvements using Figma and conducted QA for new features.
- **Software Developer** **Evergreen Life**
Typescript, React, Node.js, Javascript, Docker, MongoDB, PostgreSQL, AWS *Dec 2018 - Mar 2021*
 - Full stack web development on mobile & web applications
 - Refactored mobile application from jQuery & Angular to modern React & Typescript
 - Testing & QA for new features with Mocha, Jest & Enzyme

Additional Information

Outside work I enjoy reading, writing, live music, galleries and hiking. You can check out my tech blog [here](#).
